# Research Objectives

- Main Objective:
  - To investigate infrastructure, applications and services that facilitate users interaction over integrated networks (fixed and mobile networks).
- Specific Objectives:
  - To develop a basic distributed services platform for collaboration over integrated data networks.
  - To evaluate and propose mechanisms for the integration of fixed and mobile communications networks.
    - Web 2.0, OWL, Open and free Web Services,
    - IPv6, Mobile IP, QoS, Network security, SIPng, etc.
